Donna

Donna Mills—A Fiery Stunner who proves toughness and tenderness can go hand-in-hand. This perfect description came from one of you, who overwhelmingly voted for the blond bombshell who plays Abby Ewing on *Knots Landing*. "Her full, tousled look is what every woman wishes she possessed," wrote an admirer.

The word makeup came up over and over again on your responses. "I've always been fascinated with Donna's eye makeup to the point that I bought her video (*The Eyes Have It*)," a reader exclaimed, while another simply said, "Gimme those eyes!!!!" As you said, Donna's style is exciting, sexy and elegant — evidenced here in her award-winning look. To wear it, curl hair away from face on large rollers; then tease, brush, spray and enjoy!

Madonna

Who's That Girl? Madonna! You'll never forget last summer, when you dressed up like Madonna and packed into the stadium for the concert of the year. So it comes as no surprise that you voted Madonna into the Top 10. While some readers talked about her great voice, others stressed her trend-setting influence. "She's daring, even radical at times," you pointed out. Madonna

encourages "women to go boldly into any hairstyle they want and feel good about it!" As one fan said, Madonna started a new fad by going from dark brown to platinum blond hair color. If you want to go blond, do what Madonna did—she consulted the experts at Bumble & Bumble salon in New York City. For this star-studded style, apply gel or styling lotion. Using a curling iron, slightly bend the ends, before lifting the top and combing one side back.
